

## Software Product Manager - Dublin/Luxembourg/Paris

The ideal candidate currently works in the RegTech / FinTech space as a product manager, or works for an investment management firm or third-party fund administrator / service provider as product manager or business analyst with direct exposure to the regulatory demands of the global investment management industry.

### Responsibilities:

- Develop a clear strategic vision for your product area and ensure the vision is continuously communicated to all stakeholders
- Maintain the relevant product feature backlog and roadmap, as well as manage the prioritization of tickets for each product sprint based on service team, market, and customer impact; You will ensure business priorities are reflected in the delivery timelines
- Lead requirements gathering in terms of regulatory reporting or compliance changes, with high- quality user stories and clearly defined acceptance criteria
- Gain a deep understanding of customer experience, identifying and filling product gaps, and generate new ideas that grow market share, improve customer experience and drive growth
- Act as a product evangelist to build awareness and understanding
- Represent the company by visiting customers to solicit feedback on company products and services
- Assist with product demonstrations and presentations to internal and external audiences

### Requirements:

- 3+ years' experience as a product manager or business analyst with a specific focus on investment industry regulation and/or regulatory reporting
- Experience with or knowledge of UCITS, PRIIPs, Transaction Cost Calculations, MiFiDII, ESG related regulations, or Solvency II necessary
- Experience in managing roadmap definition and deliveries
- Strong scrum experience required, JIRA/AHA experience ideal
- Ability to foster a creative and collaborative approach to product design
- Comfortable working with market participants (clients and prospects) as well as internal technical, delivery and service teams
- Good analytical and financial/math/statistical skills
- Excellent written and verbal communication skills (including fluent English)
- Educational background will be to university/degree level either in a technical discipline (with experience and exposure to business teams), or a business/financial discipline (with experience and exposure to technical teams)
