

Position: Backend/.Net Developer

Location: Valencia

A fast-growing, global leader in providing regulatory compliance solutions to the financial services industry, Compliance Solutions Strategies (CSS) seeks a Backend .NET developer with overall responsibility for building and maintaining our regulatory reporting platform. The Backend .NET developer will participate in the design, development, and implementation of our online regulatory reporting system. CSS offers competitive remuneration package.

About CSS:

Compliance Solutions Strategies (CSS) is a trusted global RegTech partner that uniquely brings together innovative technology- driven solutions to support financial services firms in navigating a clear and strategic path through the complex and fragmented global regulatory space. Our solutions and services help firms meet regulatory deadlines while optimizing compliance data, operations, and technology. CSS covers a full range of global compliance disciplines spanning fund reporting, transaction reporting, investment monitoring, compliance management, compliance services and managed services with a complementary, centralized approach to the strategic management of regulatory data called RBOR (Regulatory Book of Record). For more information on CSS, please visit: www.cssregtech.com.

Responsibilities:

- Participate in design and development of complex software projects, writing technical specification
- Work with product managers and QA engineers from development to production
- Contribute to software architecture design, development of software applications, and integration into enterprise systems

Minimum Requirements:

- 5+ years of working experience
- Experience in .NET Framework, .NET Core, package management, and dependency injection
- Good knowledge and development experience with Databases (SQL Server), query optimization, stored procedures, and Entity Framework integration
- Experience with distributed architectures and REST APIs
- Experience with gRPC APIs is a big plus
- Experience with continuous integration and continuous delivery
- Experience supporting and scaling consumer-facing applications and services
- Agile/SCRUM Software Development Process experience
