

Position: Quality Assurance Analyst

Location: Dublin

About CSS:

Compliance Solutions Strategies (CSS) is a trusted global RegTech partner that uniquely brings together innovative technology- driven solutions to support financial services firms in navigating a clear and strategic path through the complex and fragmented global regulatory space. Our solutions and services help firms meet regulatory deadlines while optimizing compliance data, operations, and technology. CSS covers a full range of global compliance disciplines spanning fund reporting, transaction reporting, investment monitoring, compliance management, compliance services and managed services with a complementary, centralized approach to the strategic management of regulatory data called RBOR (Regulatory Book of Record). For more information on CSS, please visit: www.cssregtech.com.

Job Summary:

The Quality Assurance Analyst is a key role within the CSS project lifecycle process with the successful candidate being responsible for the testing of the strategic CSS suite of products into our client base and for all aspects of the testing lifecycle. Your core activity will center on working with our client's data sets; testing data mappings for addition to the CSS product suite, working closely with the CSS Development & Data Management teams to ensure that all data management & development tasks are correctly implemented in line with the business requirements. The role will play a central part in ensuring that requirements are tested correctly.

The ideal candidate will be working in the testing industry today in a service provider company supplying technology and/or services to that that industry. In addition, the ideal candidate will be very comfortable working with testing financial data as the role is heavily focused on data testing and any test automation experience would also be an advantage.

Responsibilities:

- Testing financial software and product solutions according to the documented test plans, schedules & procedures.
- Creation of manual & automated test cases.
- Creation of test plans and test specifications.
- Report to the QA manager on QA progress for assigned projects.
- Schedule QA activity.
- Execute manual & automated test cases, analyze results, report & track bugs, verify fixes and perform follow up work to resolve issues.
- Attend project meetings and report on QA progress.
- Demonstrate continuous effort to improve operations, streamline & document work processes, and work cooperatively within a team.

Requirements:

- Excellent communication (written & verbal), interpersonal and presentation skills.
- Excellent attention to detail, ability to work on own initiative and the ability to work under pressure and to tight deadlines.

- Knowledge of Quality Assurance practices and procedures
- Experience of test automation, scripting, regression testing and commonly used tools an advantage.
- SQL knowledge & experience with use of the following tools: TestRail, JIRA, Confluence, Test Complete are an advantage.
- Fluent in English
